Gol Series
TUBULAR LOUVRE SYSTEM

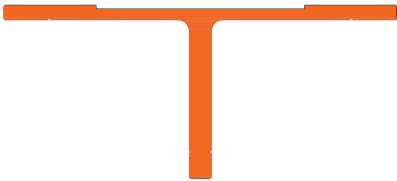

Gol Series round louvres consists of aesthetic and engineered blades of varying diameters, as specified, organised architecturally.

The **Gol** can be configured in different profiles for optimum sunshading and privacy screen applications. Aambianz proprietary bracketing systems can be used to achieve different geometrical profiles.

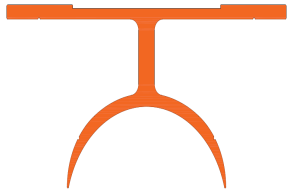

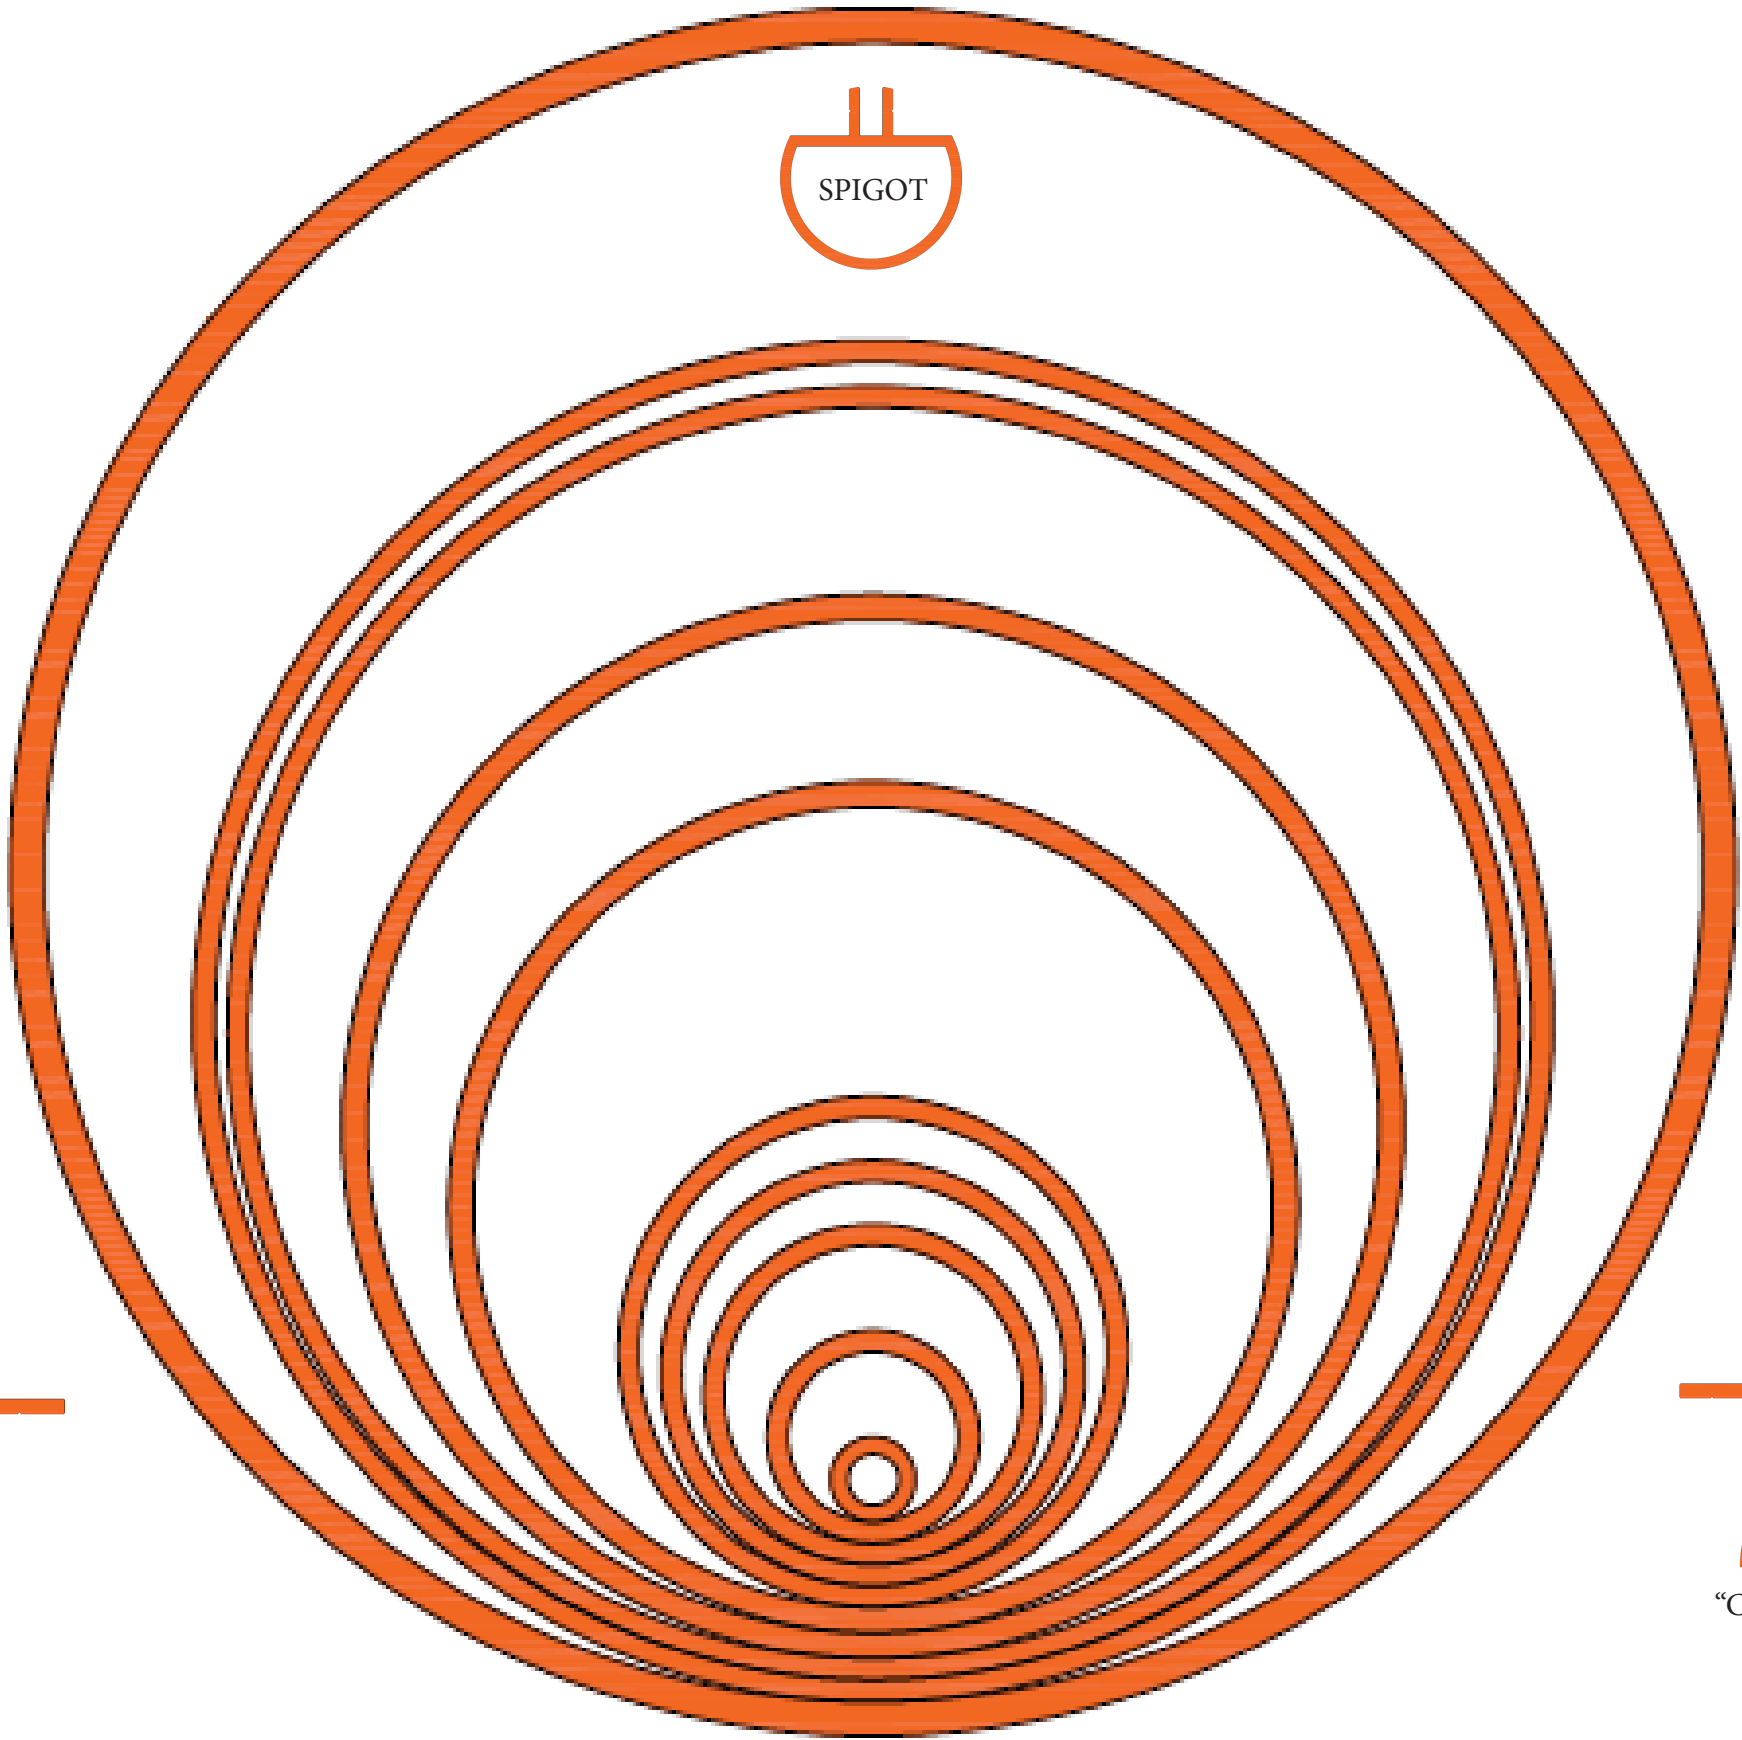

The system is complete with engineered aluminium C and T brackets with internal spigoting systems to achieve seamless joints. Engineered bracing and support systems are available for other applications.

The extruded aluminium blades are available in anodised, powder coated or painted finish. The louvre blades are manufactured with structural aluminium end caps and stainless steel fixings.

All Aambianz products are engineered to Australian standards and adapted to project design requirements.
